THE FAUCI & GAIN OF FUNCTION PAGES

I'll bet you're wondering what these adorable beagles have to do with Tony F?

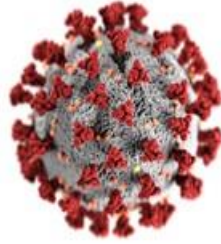

Read on. I won't break the sad news to you just yet.

Dr. Anthony Fauci –who has been in a very high position in D.C. since the days of President Reagan, and is the highest paid government employee in Washington, at about a half million dollars.

This will be a two-part mailing, because a lot of this is intertwined with Gain of Function Research (GFR). And so too, are those adorable puppies, above.

Page Two

This morning as I typed up the front page, I wondered whether Fauci received any royalties for his work with vaccines as I knew well about a certain fund-raiser at an [eminent physician](#) at a local hospital. It didn't take 12 hours before I

received an email from [Judicial Watch](#) they had requested that information, and more, under the Freedom of Information Act. Evidently other FOIA documents they had requested but he felt he was above the law and failed to reply. The Judicial Watch link above will explain more.

J.W. delineated Fauci's [conflicts of interest](#) which they needed answers on and he declined to answer their Freedom of Information Petition. It also didn't reflect well on [Mrs. Fauci](#). She heads NIH bio-ethics on covid

vaccine!! Christine Grady is a longtime nurse and the current chief of the department of bioethics with the National Institutes of Health (NIH). Her role seems to be to preside over the ethical questions of testing vaccines. "This may present a conflict of interest. It does not inspire confidence given the questions surrounding Fauci and his involvement with the Wuhan lab." This is a direct quote from the article hyperlinked above where the text reads "Mrs. Fauci."

We have had it drilled into our heads to **FOLLOW THE SCIENCE,**

However, nobody has said anything about the need to

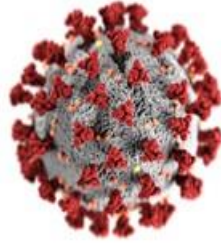

FOLLOW THE MONEY – and if you worship Dr. Fauci, you might not to move on to the next section, but if you want your eyes opened a bit more, continue this article.

"No one is above the law including Dr. Anthony Fauci. It shouldn't take a subpoena or a lawsuit to force open basic employment documents that executive-level federal bureaucrats are required by law to file," said Adam Andrzejewski, CEO and founder of [OpenTheBooks.com](#). **"We thank Judicial Watch for being a good friend and partner in this important matter."**

"Anthony Fauci wields unrivaled political power in our federal government, so it is urgent the American people have full access to his financial disclosures," said Judicial Watch President Tom Fitton. **"That we had to file a federal lawsuit about Dr. Fauci's financial disclosures and other basic employment information raises a host of concerning questions."**

One of the biggest mistakes we make when it comes to health is we listen to the loud words of corrupted minds and not to the soft whispers of nature.

Paraphrased from the Best-Selling Book, Freakonomics

Patents Held by CDC Proving Covid is Man-Made

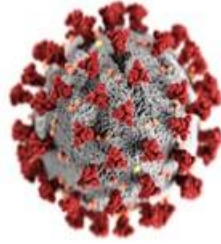

That CDC patent also had several derivative patents associated with it, including U.S. patent 46592703P and U.S. patent 7776521. These two patents cover the gene sequence of SARS coronavirus and the means for detecting it using RT PCR testing. [READ MORE](#) Fauci denied this before Congress.

Fauci Scrambled to Cover Things Up about the ties to Wuhan Lab

In January, 2020, when the World Health Organization insisted that COVID-19 [wasn't transmissible](#) between humans, and Dr. Anthony Fauci said that the risk to the American public from the virus was "[low](#)," officials at the National Institutes of Health were [scrambling to perform damage control](#) after a controversial – and now withdrawn – study suggested that there were HIV-like 'insertions' included in SARS-CoV-2. Further articles about the cover up and misnaming the virus deliberately are provided in the links at the end of this section. See yet another [racism accusation!](#)

[As the Story of Gain of Function Research Gained Traction – July 2021](#)

Senator Rand Paul questioned Fauci before Congress and accused him of lying, and called for his immediate resignation. [Read More](#)

Here we are 100 days since this was on the news, and he persists in his lying. Why is this so important?

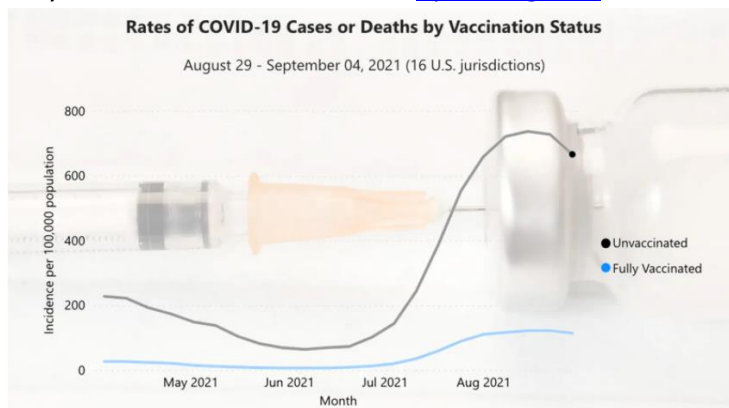

[The Scientific American Defines GAIN OF FUNCTION:](#)

The microbiology toolbox includes techniques to induce mutations in viruses that give the microbes new powers. Scientists perform these manipulations for many reasons, including wanting to understand how the microbes evade detection by our immune systems. But adding capability to a pathogen carries obvious risks, especially if this “gain of function” involves enhanced virulence or infectiousness. Escape from a lab, by accident or design, is a possibility. So why do it? Some researchers argue the work can offer a peek at what a virus can do before it goes into the natural world and poses a threat to people. [READ MORE](#)

**SCIENTIFIC
AMERICAN®**

[The Fact of the Matter is: THEY ARE TOO BUSY COVERING UP, AND WORKING FROM HOME TO BE ABLE TO TELL US ANYTHING YET, DEMOGRAPHICALLY.](#)

Do your own research on this one [by clicking here](#).

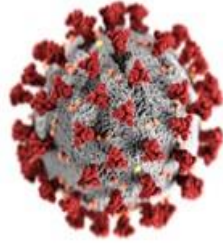

The CDC has begun to provide weekly data on [COVID-19 cases and deaths by vaccination status](#), illustrating the stark differences between those who have received the shots and those who haven't -- and even revealing some differences between vaccines.

I just got this as I completed this section, and have not had a chance to review it. Would one of the many physicians who reads this please give me a few paragraphs I can use for the outcomes of finally getting some real demographics. [From Med Page Today](#).

IF YOU ARE SENSITIVE TO ANIMAL WELFARE ISSUES, YOU MIGHT WANT TO SKIP THE NEXT PAGE QUICKLY. It's about the beagles on the cover of this issue.
